FOR HANDS & HEALTH

MANO HYGIENE DISPENSER COLLECTION

FOR HANDS & HEALTH

Effective hand hygiene remains one of the best tools for preventing healthcare-associated infections, cross-infection, spread of antimicrobial resistance and in general contagious diseases. In the end efficient hand hygiene can ultimately save lives!

Desinfecting hands and hand washing are a habits that has come to stay!

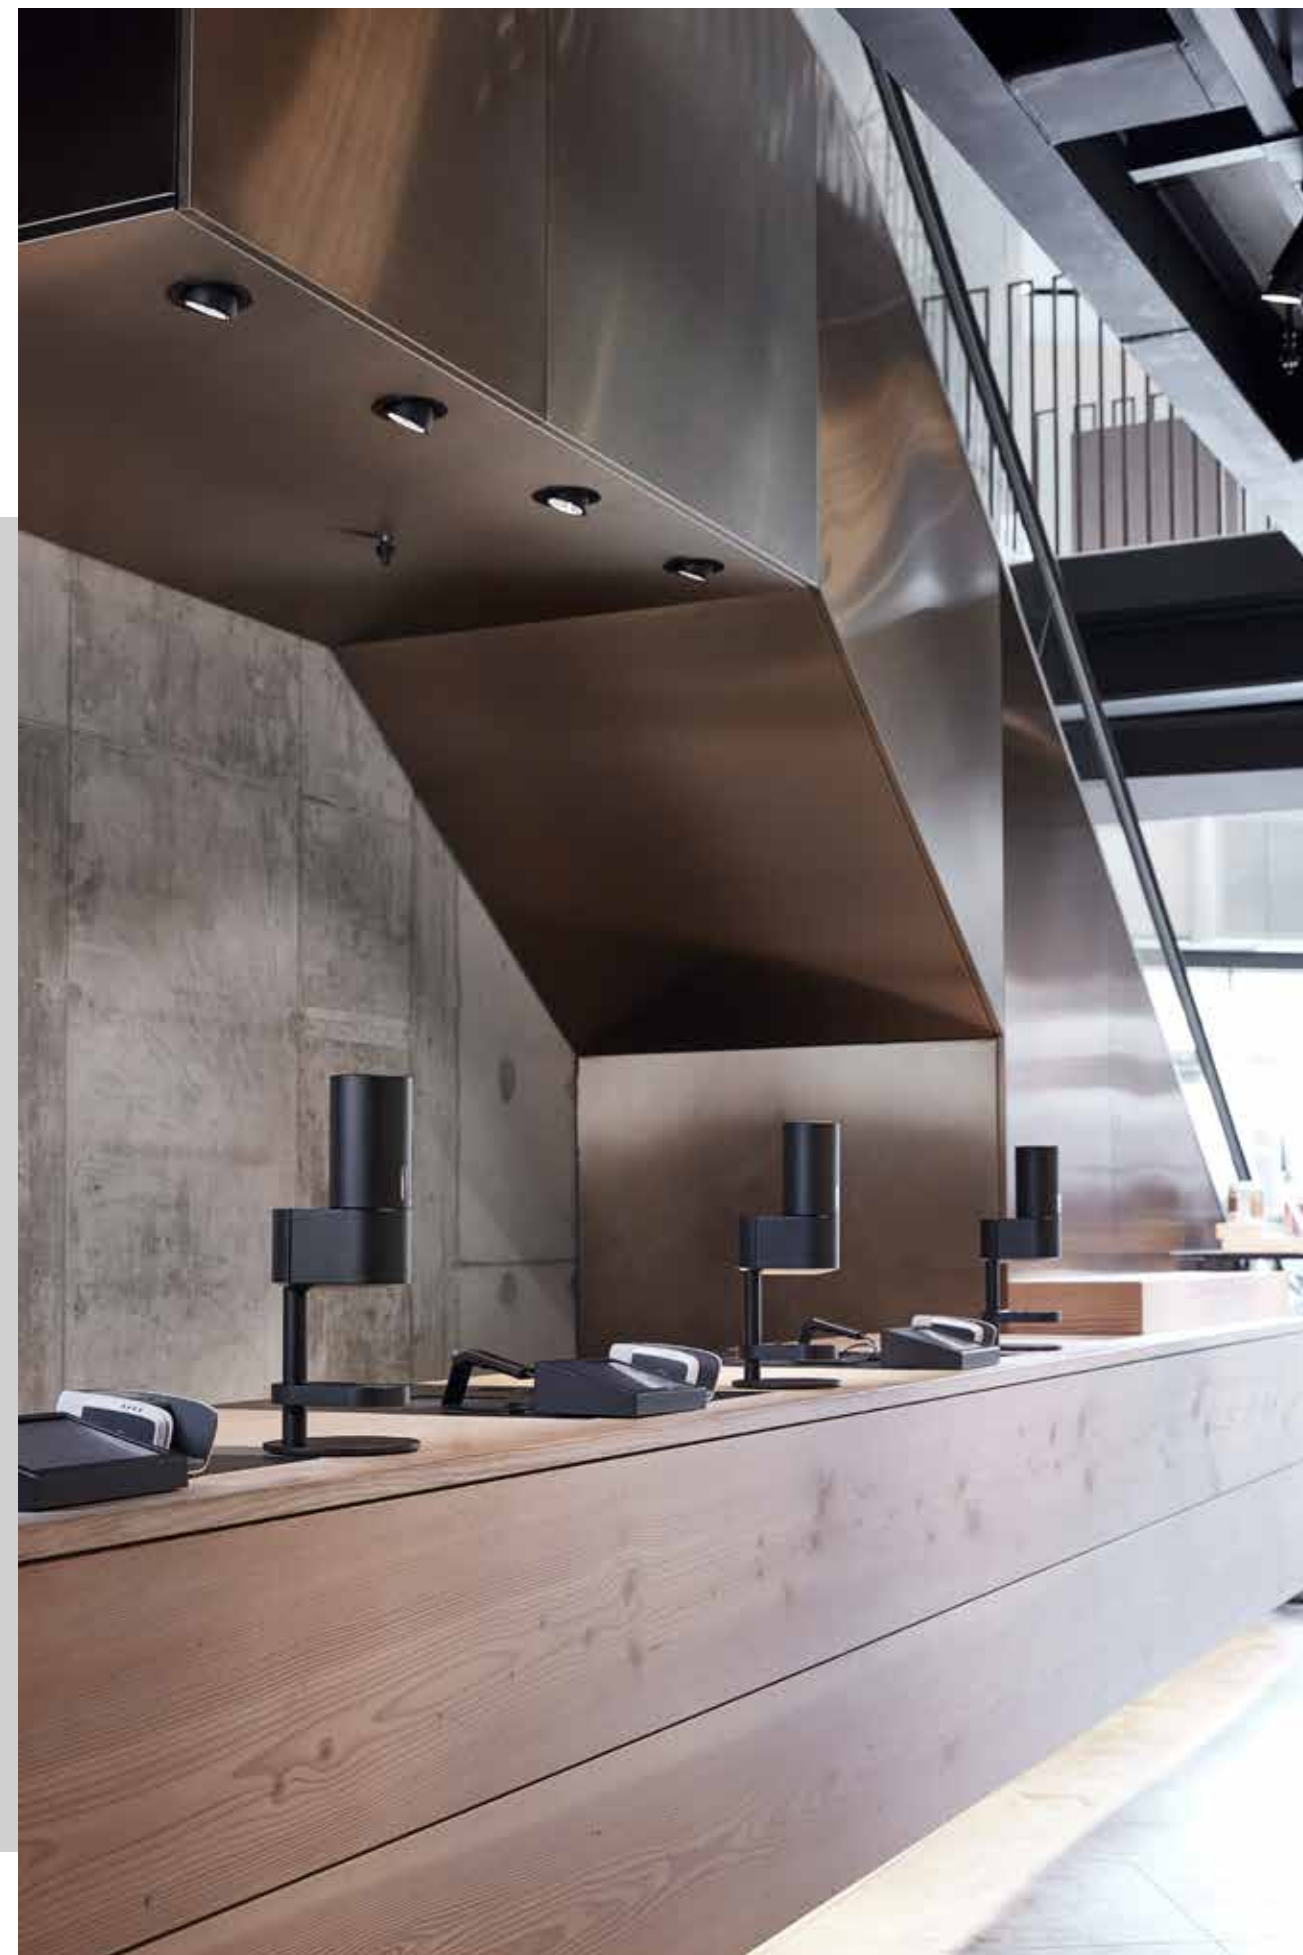

That's why we've put extra effort into designing a dispenser collection that is beautiful, discreet and functional.

The dispensers can be used for both disinfection sanitizer as alcohol or gel, soap, shampoo etc. depending on your needs.

MANO FLOOR

With the Mano floor stand you have great flexibility moving the dispenser around to where it will be most needed. It can be placed outside the door, so everybody will see the dispenser clearly.

MANO WALL

The mano collection is available in 3 different variants to suit most environments. The small hole in the front indicates when the dispenser is about to be empty.

This is also very easy to install with a fitting that are mounted on the wall and afterwards the dripping tray is slided down on the bracket. In this way it is also very easy to clean.

MANO TABLE

To avoid disinfection gel or sope
on the wall or floor you can use
Mano wall extended tray.

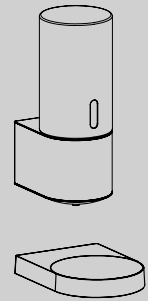

MANO FLOOR

The Mano floor stand will complement your interior in a subtle elegant way.
